

# STACK OVERFLOW DEVELOPER SURVEY 2019

Vitarius Zsofia

October 3, 2024

# OUTLINE

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# EXECUTIVE SUMMARY

---

- Analysis goal
- Methodology
  - Data gathering
  - Data analysis
  - Data visualization
- Results
- Discussion
- Final conclusion

# INTRODUCTION

---

- Analyze datasets to identify trends in emerging technologies
- Sources: Surveys, Job postings, Blog posts
- NB: Results do not represent everyone

# METHODOLOGY

---

- Collecting survey data
  - Web Scraping
  - APIs
  - Request library
- Data wrangling
- Exploratory data analysis
  - Analysing data distributions
  - Handling outliers
  - Exploring correlations
- Data visualization
  - Distribution, relationship, comparison of data with charts
  - Dashboard

# RESULTS

---

# PROGRAMMING LANGUAGE TRENDS

## Current Year

Top 10 Programming Language Worked With

## Next Year

Top 10 Languages Desire Next Year

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- JavaScript the most worked with programming language
- HTML/ CSS is the second most popular language
- SQL is the third one

## Implications

- JavaScript and Python continued or growing demand for professionals
- HTML/CSS slight decline in future interest
- SQL consistent demand suggest

# DATABASE TRENDS

## Current Year

Top 10 Databases Worked With

2

## Next Year

Top 10 Databases Desire Next Year

6

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- MySQL is the most frequently worked with database
- Microsoft SQL in the top 3
- PostgreSQL and MicrosoftSQL has almost the same usage

## Implications

- PostgreSQL's rising popularity
- Decline in MySQL usage
- Steady demand for Redis and Mungo DB

# DASHBOARD

# DISCUSSION

---

# OVERALL FINDINGS & IMPLICATIONS

---

## Findings

- Increasing Linux dominance
- Mostly USA respondents
- Only 2% of the respondents are woman

## Implications

- Rising popularity of Python
- AWS leading position
- Implication 3

# CONCLUSION

---

- JavaScript and Python: The high demand for JavaScript and Python indicates their critical roles in web development, data science, and automation, suggesting these skills will remain highly valuable.
- MySQL's Reliability: MySQL's strong presence as the most desired database highlights its reliability and continued importance in database management.
- Linux Expertise: The preference for Linux underscores its significance in server management and cloud computing, indicating a sustained need for Linux skills.
- Gender Imbalance: The significant majority of respondents from one gender category suggests potential gender imbalances, which could impact the generalizability of the findings and highlight the need for more inclusive practices.
